

England is a single but unmistakable specimen collected near the Boston & Albany Railway at Newtonville, Mass., July 28, 1881, by C. J. Sprague. It is very doubtful if this species has persisted in our flora.

Some further notes regarding the plants of this list will be published in the August number of RHODORA.

GRAY HERBARIUM.

HENRY GRISWOLD JESUP.— It is with deep regret that botanists will learn of the death at Hanover, New Hampshire, on June 15th, of Henry Griswold Jesup, for twenty-two years professor of botany at Dartmouth College and since 1899 emeritus. Professor Jesup was one of three noted botanists who graduated from Yale College in the class of 1847, the others being the late Sereno Watson, for many years curator of the Gray Herbarium, and Mr. John Donnell Smith of Baltimore, well known for his extensive and critical work upon the flora of Central America. Professor Jesup's botanical work was chiefly systematic and devoted to the local flora of the region about Amherst, Massachusetts, and later in the vicinity of Dartmouth College. His most important publication was his Catalogue of the Flowering Plants and Higher Cryptogams, both native and introduced, found within thirty miles of Hanover, New Hampshire; issued in 1891, after some preliminary publications upon the same subject.

In his teaching his gentle and kindly nature, combined with his obvious affection for his subject, has left for him a deep and lasting regard in the minds of his many students. Among those who enjoyed his instruction and who have since become known for their professional or amateur work in botany are Professor F. O. Grover of Oberlin College, Mr. W. W. Eggleston, an energetic collaborator on the recent and admirable Vermont catalogue, and Mr. H. E. Sargent.

Two plants, *Astragalus Robbinsii*, var. *Jesupi*, Eggleston & Sheldon, and *Crataegus Jesupi*, Sargent, have been named in Professor Jesup's honor. His herbarium has been permanently deposited at Dartmouth College, and is now in charge of his successor, Professor George R. Lyman.

A SECOND STATION FOR *CYPERUS HOUGHTONI* IN VERMONT.— While driving in Chelchester, Vermont, in October, 1901, at a place where the road passes through a piece of dry shifting sand, I noticed
